

# Leadership

The Dr. Nancy Foster Florida Keys Environmental Complex includes offices, a maintenance facility, and an outreach visitor center for the National Oceanic and Atmospheric Administration's (NOAA) Florida Keys National Marine Sanctuary. Among the many environmentally friendly features, the facility reduces overall energy consumption by 30% over traditional construction; features a "green roof" to reduce energy and improve storm water management; uses cistern water to flush toilets; and incorporated recycled or sustainable growth materials in construction. NOAA is also pursuing a Leadership in Energy and Environmental Design (LEED) certification for the facility through the U.S. Green Building Council.

Dr. Nancy Foster Florida Keys  
Environmental Complex  
Key West, FL

*The NOAA complex incorporates natural daylight for bright spaces, indigenous plants as part of the building shell, and sustainable building materials throughout the complex.*
